Q3 2024 Highlights

- Revenue of USD 86.2m, up 23% compared to Q3 2023 (USD 70.4m)
 - Growth from acquisition of Ross Offshore¹ contributing USD 17.8m revenue
 - OWC experienced lower activity level because of a reduction in demand in the offshore wind market
- Adjusted EBIT of USD 3.0m (Q3 2023: USD 6.2m)
 - Adjusted EBIT margin of 3.4% (Q3 2023: 8.9%, Q3 23 pro-forma: 7.8%)
 - Margin reduction primarily from ABL and OWC segments, as well as integration of structurally lower margin Ross Offshore
 - Solid performance in Longitude and AGR existing businesses
- Net cash of USD 7.9m (Q2 2024: USD 10.8m)
 - Net cash outflow primarily driven by working capital increase, primarily driven by expected unwinding of Ross Offshore project prepayments
- Continued M&A activity
 - Ross Offshore fully consolidated from Q3 2024
 - Hidromod completed immediately after Q3 close, to be consolidated from Q4 2024
- Semi-annual dividend of NOK 0.40 per share declared, to be paid in November

- Revenue growth of 23% YOY driven by Ross Offshore acquisition adding USD 17.8m to AGR segment
 - Flat revenue in ABL and existing AGR businesses, while OWC (-30%) and Longitude (-10%) had negative YOY growth
- Group margin reduction primarily from ABL and OWC
 - ABL in line with long run margins, with slightly lower utilisation after strong 2023 performance
 - Low activity level in OWC continues
 - Reduced utilisation from continued slow offshore wind market
 - Overall loss-making in quarter due to investments of USD 0.5m in US onshore technical due diligence business ahead of building up revenues
 - Improved margin from existing AGR business balancing low margin in Ross Offshore
 - Bounce-back for Longitude after weak Q2

Modest organic staff growth

Staff level development¹

- 1,753 average number of employees including freelancers in quarter, representing 12% growth (3% organic) from Q3 2023
 - Ross Offshore consolidated from Q3 2024, adding 136 people
- Freelancer share of 32%, in line with Q3 2023
 - Increase in freelancers in AGR segment from acquisition of Ross Offshore
 - More use of employed tech staff over freelancers where possible
 - Freelancer model provides a flexible cost base, to accommodate seasonal and cyclical variations

Tech staff development by segment, including freelancers²

- Organic staff growth primarily driven by ABL
- Recruitment freeze outside specific growth areas in OWC
- Staff growth in AGR mainly from consolidation of Ross Offshore
- Group tech staff growth of 11% compared to Q3 2023

¹ Average full-time equivalents in the quarter, including freelancers on FTE basis, excluding temporary redundancies. Freelancer share is % of total technical staff

² Growth relative to Q3 2023.

Offshore wind: Slowdown extended, but long-term view remains strong

Offshore wind projects by installation year (GW) ¹

Comments

- High interest rates and developer caution/sentiment continue to impact offshore wind roll out – installation volume has generally been delayed 18-24 months
- Whilst bidding and awards are picking up, indicating that the market has bottomed out, we currently don't expect significant improvement before 2H 2025
- Long term prospects remain strong, with rapidly accelerating installation plans 2028-2031 expected to drive development support work 2025-2028
 - OWC supports projects from auction stage, but largest volumes of work are post auction, around 3-5 years before installation
 - ABL and Longitude primarily supports projects before and during installation
- OWC actively investing in growth in renewables markets outside offshore wind in order to diversify exposure
 - Onshore (wind, solar, BESS) and hydrogen increased from 11% of hours billed by OWC in 2023 to 17% in 2024 YTD

Solid activity – increasing volatility in select markets

E&P capex growth

Rigs under contract

Summary and outlook

- Mixed performance in Q3 2024
 - Margins depressed by reduced utilisation and project phasing across several segments
 - Solid performance with quarterly improvement in Longitude and AGR
 - Through the cycle adjusted EBIT guidance still stands at 6.5% following Ross Offshore and Hidromod integrations
- Mixed market outlook
 - O&G: Solid activity – global spending and rig count growth stagnating amid volatility in individual markets
 - Renewables: We retain a positive long-term view and believe the offshore wind market has bottomed out, but we currently do not expect significant improvement before 2H 2025 amid continued project delays
 - Maritime: Maintaining strong position in stable market
- Maintaining focus on returning cash to shareholders on semi-annual schedule
 - Semi-annual dividend of NOK 0.40 per share to be paid in November, corresponding to USD 4.8 million
- We remain active in consolidation of the energy consultancy industry

General (1/2)

Basis of preparations

This presentation provides consolidated financial highlights for the quarter of the Company and its subsidiaries. The consolidated financial information is not reported according to requirements in IAS 34 (Interim Financial Reporting) and the figures are not audited.

The accounting policies adopted in the preparation of this presentation are consistent with those followed in the preparation of the last annual consolidated financial statements for the year ended 31 December 2023. A description of the major changes and the effects are included in note 2 (standards issued but not yet effective) of the ABL annual report 2023 available on www.abl-group.com.

The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Alternative Performance Measures (APMs)

ABL discloses APMs in addition to those normally required by IFRS. APMs are meant to provide an enhanced insight into the operations, financing and future prospects of the company. Certain items may not be indicative of the ongoing operating result of the company and are excluded from the alternate profit measures. Profit measures excluding those adjustment items are presented as an alternative measures to improve comparability of the underlying business performance between the periods. The Company has defined and explained the purpose of the following APMs:

Adjusted EBITDA which excludes depreciation, amortization and impairments, share of net profit (loss) from associates, transaction costs related to acquisitions, restructuring and integration costs is a useful measure because it provides useful information regarding the Company's ability to fund capital expenditures and provides a helpful measure for comparing its operating performance with that of other companies. EBITDA may not be comparable to other similarly titled measures from other companies.

Adjusted EBIT which excludes amortisation and impairments, share of net profit (loss) from associates, transaction costs related to acquisitions, restructuring and integration costs is a useful measure because it provides an indication of the profitability of the Company's operating activities for the period without regard to significant events and/ or decisions in the period that are expected to occur less frequently.

Adjusted profit (loss) after taxes which excludes amortisation and impairments, share of net profit (loss) from associates, transaction costs related to acquisitions, restructuring and integration costs and certain finance income is a useful measure because it provides an indication of the profitability of the Company's operating activities for the period without regard to significant events and/or decisions in the period that are expected to occur less frequently.

Order backlog is defined as the aggregate value of future work on signed customer contracts or letters of award. ABL's services are shifting towards "call-out contracts" which are driven by day-to-day operational requirements. An estimate for backlog on "call-out contracts" are only included in the order backlog when reliable estimates are available. Management believes that the order backlog is a useful measure in that it provides an indication of the amount of customer backlog and committed activity in the coming periods.

Working capital is a measure of the current capital tied up in operations. The amount of working capital will normally be dependent on the revenues earned over the past quarters. Working capital includes trade and other receivables and contract assets, trade and other payables, current tax payable, and contract liabilities. Working capital may not be comparable to other similarly titled measures from other companies. Working capital ratio provides an indication of the working capital tied up relative to the average quarterly revenue over the past two quarters.

General (2/2)

Alternative Performance Measures (APMs) continued

Return on equity (ROE)

ROE is calculated as the adjusted profit (loss) for the period attributable to equity holders of the parent, divided by average total equity for the period. The adjusted profit (loss) is annualised for interim period reporting. This measure indicates the return generated by the management of the business based on the total equity.

Return on capital employed (ROCE)

ROCE is calculated as the adjusted EBIT for the period, divided by average capital employed for the period. Capital employed is defined as total assets less non-interest bearing current liabilities. The adjusted EBIT is annualised for interim period reporting. This measure indicates the return generated by the management of the business based on the capital employed.

Net cash

Net cash is calculated as the cash and cash equivalents minus interest-bearing debt excluding lease liabilities. This is a useful measure because it provides an indication of the company's liquidity, without being affected by drawdown and repayment of bank debt or the length of the group's office leases. ABL Group's lease liabilities predominantly relate to office leases of varying length, and depreciation of such leases is included in the Operating Profit (EBIT) and Adjusted EBIT measures.
